

# \$1 Puts This Fine Boone In YOUR Home

The Boone is the most popular kitchen cabinet on the market. Because of its many labor-saving features (all of which cannot be found on any other line of cabinets) it saves time, economizes on space, cuts kitchen labor in half, conserves expensive cooking materials and provides a handy and permanent place for dishes, pans, crockery, silverware, groceries, etc., etc.

The cabinet shown in the illustration is all Oak, Colonial design, finished Golden with full Extension Top. Height, 6 feet. Full enameled top. Art glass in doors. This cabinet has removable sifter flour bin, glass spice, tea and coffee canisters, and metal bread box. It has full sliding nickeloid table top, roller bearing.

This will be delivered into your home for **\$28.00** \$1.00 down. You pay the balance in weekly installments of \$1.00 each. 15 other styles if this one does not please you—All prices. Call today, deposit your dollar and begin using your cabinet tomorrow.

### BRATTLEBORO LOCAL.

The New England auxiliary will meet this evening at 8 o'clock with Mrs. Harry Holland of Canal street.

The J. E. Hall Bible class of the Baptist church will hold its monthly business meeting tomorrow evening with Mrs. W. H. Haigh of Washington street.

The Princess theatre presents today Mark Twain's story, Pudd'n-head Wilson. Tomorrow Mary Boland, former leading lady with John Drew, will be seen in a modern society drama, The Price of Happiness.

Wallace S. Allen of Jacksonville, a well-known and successful farmer of that town, and Miss Sadie G. Hejyar, daughter of Mrs. A. M. Hejyar of Spruce street, were married Saturday evening at 8 o'clock in the Universalist parsonage by Rev. Dolmar E. Trout. They were unattended. A single ring service was used. Mr. and Mrs. Allen will make their home in Jacksonville, where Mrs. Hejyar has many friends as she taught school there last winter.

Rev. William Shaw of Montpelier, and Sanford A. Daniels of Brattleboro have returned home from Saratoga Springs, N. Y., where they have been attending the general conference of Methodist Episcopal churches. Although not a candidate for election as a bishop Mr. Shaw received seven votes which were from outside the Vermont delegation and which were complimentary of Mr. Shaw's ability. Mr. Daniels was a member of the committee of 60 and the only man from the New England states on the committee relative to the effort to combine this conference with that of the Methodist Conference South.

Special this week at the Dunham greenhouse, 18 Linden St. Carnations 35c doz., snapdragon 32c, salvia plants 35c and 50c doz, tomato plants 35c and 50c doz. All other cut flowers and plants at cut prices. Tel. 457-W. R. H. Messenger. —Adv. 82-4f

B. H. S. Glee Club concert, high school room, Monday evening, June 5, at 8 o'clock. Admission 25 cents. —Adv. 81-82

### TOWNSHEND

George Gale of Chester is visiting relatives this week.

Arthur Ball and son, Frank Ball, have gone to Greenfield, Mass., where they have work.

Mr. and Mrs. Rexford Benson and children of Brattleboro were guests at A. D. Benson's Sunday.

Miss Ella Stebbins of Springfield, Mass., is at the home of her father, C. Q. Stebbins, for a short vacation.

Raymond Phillips, who is working for the Dunham Brothers Co. in Brattleboro, spent the weekend at home.

The usual ball game between the seminary nine and alumni will be played Thursday afternoon after the commencement exercises.

The senior reception to be held in Academy hall Thursday evening, June 8, will be also a farewell reception from students and townspeople to Prof. and Mrs. G. W. Powers, who will go at once at the close of the school to their home in Athens.

Twenty-five members of West River Grange went Friday evening by team and automobile to West Townshend to observe neighbors' night. A program was given, including vocal and instrumental music, readings and the farce Her Deaf Ear. Refreshments of ice cream and cake were served by West Townshend Grange and a pleasant social hour was thoroughly enjoyed.

British life insurance companies thus far have paid \$20,000,000 in losses on war victims.

A Quiet Supper for Four

Comedy with Eddie Lyons and Lee Moran

Cold Spring Camps

are beautifully situated at AVERILL, VERMONT, 1,300 feet above sea level, on Forest and Averill Lakes. They are built in the midst of thousands of acres of Spruce, Hemlock and Cedar, and consist of single and double cabins fitted with stoves and clean spring beds. Flies, midges and mosquitoes are practically unknown. The fields and woods are full of birds with flowers and berries. The table is furnished with an abundance of carefully selected, well cooked food. Lakes are stocked with brook trout, lake trout and salmon. Ideal summer home for families or single ladies. Rates reasonable. Address until May 1, C. M. QUIMBY, Averill, Vt.

### NEEDED HIS WINTER CLOTHES

Minus-Zero Blast Chilled the Captain of the Merton Hall, Arriving From the Tropics.

From a torrid heat of 110 degrees into a minus-zero blast came the British steamship Merton Hall from India, a few weeks ago. Captain Sullivan could not find words to tell how inhuman he found Boston weather. The ship was six inches deep in ice, its sides so white one might say they were painted so. The navigating bridge was a toboggan trampled by hobnailed boots that tortured. Captain Sullivan vowed it seemed as if the whole world was freezing up, and awning stanchions, the electric fans and screened doors, the tumbler with the lemonade straws and the canary were hollow mockeries.

When the Merton Hall crept up harbor with anchors and chains so incased in ice it looked doubtful if they could be used. Captain Sullivan began to think of going ashore to see his agents. That gave rise to the ethics of dress, for the Merton Hall's commander was unprepared.

He had a suit of flannels like they wear at Budge Budge, the headland after leaving Calcutta. Also a gauzy hat with a gay ribbon to frighten the mosquitoes, and a bamboo cane that was the vogue in Aden. His top coat was ample protection for a storm on the Indian ocean, and of material colored like the storms of sand that sweep Suez. His gloves were just about as thin as they handle in Oran. Naturally the captain was praying for a thaw.

In the Red sea, a short time back, the ship was broiling under a sun that heated her decks too hot for the bare feet of the Chinese deck hands, while the temperature of the boiler rooms scored as high as 120 degrees. The enervating weather tapered off as the freighter neared Port Said, but it was not until some time later that arctic conditions 300 miles from Boston were encountered.

### PRISONER USES TIME WELL

Convict in Federal Penitentiary at Leavenworth Has Perfected Invention of Considerable Value.

Theodore Murdock, an inmate of the federal penitentiary at Leavenworth, Kan., has invented a motor tire casing which it is claimed will preserve the tire for a distance of 15,000 miles of rough wear, the Kansas City Star says. During the five months he was confined in "isolation" Murdock worked patiently on the main features, perfected the specifications and did everything else possible toward its completion, except to make a model. He then sent it to the patent office at Washington.

On February 22 he received a letter from the patent office informing him that his patent had been granted and that its number was 844309. Murdock claims that his improvement excludes any foreign particle from coming in contact with the tire, prevents puncture and blowouts, and at the same time gives the same resilience that the tire affords in the absence of his casing, which is fitted together so as to preserve this most necessary feature. The government "roomer and boarder" has been in communication with some of the large motor car manufacturers, and he expects to sell the patent shortly.

### Overfeeding Causes Obesity.

Those persons who had expected that Dr. Walter B. Bloor of the department of biological chemistry of the Harvard Medical school, would give expression to some new theory concerning the reduction of obesity, at his lecture on "Fat" at the Harvard Medical school recently were disappointed. Though the lecturer did admit that obesity was undesirable, most of his discourse had to do with the praise of fat as an article of human consumption. Speaking of obesity, he said, according to the Boston Post:

"The principal cause of obesity is overfeeding. Unfortunately persons approaching middle age do not know that they are overfeeding themselves. As less exercise is taken, less food should be eaten. Persons who worry require more food than persons whose minds are at ease, for worry results in greater physical, heart and mental action. A certain scientist has shown that a daily diet consisting of a cupful of milk, one ounce of butter, one-quarter pound of meat and three slices of bread means a twenty-three pound increase in weight in a year."

### Why Children Leave School.

Half the children who left school, in a large group studied by investigators of the federal department of labor, did so because of their dislike for school work. Less than a third left because their parents could not afford to keep them longer in school. These facts are brought out in a recent government bulletin. They help explain why the Gary system of education is gaining so many adherents all over the country.—Kansas City Star.

### Three Types of Sea Mines.

Submarine mines are of three types. First, ground mines, which are usually of great size and laid directly on the bottom of shallow seas; second, anchored mines, which are attached by a cable to a weight on the bottom and are designed to float at a predetermined depth, so that they will touch and be detonated by passing ships, and, third, floating mines, which are dropped on the surface of the water.—Exchange.

### WEST BRATTLEBORO

The Twentieth Century club will meet tomorrow afternoon with Mrs. J. S. Morse.

Herbert J. Clark, who is ill in his home with pleurisy, is a little more comfortable.

Myron Mather and daughter of Cambridge, Mass., came Saturday to visit his mother, Mrs. Cotton Mather.

Mrs. A. C. Ward of Claremont, N. H., is visiting several days with her mother, Mrs. Lena Barrett of Guilford street.

Mrs. Alonzo Wheelock was discharged Sunday from the Melrose hospital, where she had been three weeks for medical treatment, and went to her home in Putney.

Mrs. Frank H. Martin and daughters, Irene and Bernice, went to their former home in Amherst, Mass., Saturday to visit her parents, Mr. and Mrs. Hawley. She also will attend the wedding of her sister, Miss Bertha Hawley in Amherst June 7.

Miss Leona Wright, teacher in Brattleboro academy, was called to her home in Middlebury Saturday by the death of her father, which occurred in

Manitoba, Canada, where he was engaged in extensive farming. Miss Wright had not learned the particulars of her father's death when she left.

Ernest Nolin, who had been a patient in the Melrose hospital since last November, when he fell from the roof of the S. A. Smith Mfg. Co.'s factory and seriously injured his back, was put into a final cast Saturday afternoon by Dr. Lynch and Sunday was discharged from the hospital and returned to the home of his parents on Elliot street. It is not known definitely how long it will be necessary for him to wear the cast.

### How the Hogs Do the Work.

"Many hogs are fattened now with the aid of self feeders," says Farm and Fireside, the national farm paper published in Springfield, Ohio. "The corn, tankage, and oil meal is placed in a self-feeder. The hogs eat at will. In experiments conducted at the Iowa Experiment Station it was found that the self-fed hogs made greater and cheaper gains than the man-fed hogs. This shows that the hog will eat the proper amount for its best growth and fattening if given the opportunity."

## HERE IS THE STORY

There are pretty certain indications that

## COOKING WITH ELECTRICITY

is to become mighty popular this season.

The only problem has been a cooking rate which combines economy with the generous use of electricity.

For several years accurate records have been kept of the quantity of electricity used in cooking for a medium sized family, data being secured from several thousand families spread over the whole country. The result of such information indicates that 100 K. W. hours of electricity is ample for one month's use.

Our new rate is so low that the cost of cooking with an electric range should not exceed \$3.25 per month.
